Datasheet for #sbcw14418 DN

Recommendations:

Please read the User Manual and have a look at the FAQ at http://www.alpeslasers.ch/?a=142

WARNING: Operating the laser with higher current or voltage than specified in this document may cause damage and will result in loss of warranty, unless Alpes Lasers has permitted to do so!

WARNING: Beware of the polarity of the laser. This laser has to be powered with negative current on the laser contact (= bonding pad, corresponding to the label "laser" on the LLH) and the positive current on the base contact (= submount, corresponding to the label "base" on the LLH). To be used with a high compliance CW laser driver capable of reaching the operating current and voltage indicated in this datasheet, or up to 2.5A/20V.

Figure 1: Mechanical and electrical interface for #sbcw14418 DN (please note that the laser is connected to the DN pad drawn in blue)
Figure 2: voltage and avg power vs current in continuous-wave operation

Note: at -20C: Ith = 0.426 A / Vth = 10.9 V (2-wires measurements). Maximum operation current: 1.200A for all temperatures.
